Mr. Bill Fox
(contacted via e-mail)

Dear Mr. Fox:

Thank you for your public comment letter received on December 17, 2004, regarding Washington State's Water Quality Assessment for 2002/2004. The department received over 45 comment letters during this last review process and is appreciative of the time you took to review and comment on this assessment. We realize that there is an extensive amount of information in the Water Quality Assessment. The scrutiny given by you and other public reviewers has resulted in many changes and corrections that improved the accurateness of the final submittal to the Environmental Protection Agency (EPA).

The Water Quality Assessment is being submitted to EPA as an "integrated report" to meet the Clean Water Act requirements of sections 305(b) and 303(d). EPA will only take approval action on Category 5 of the assessment, which represents the state's 303(d) list. The Water Quality Assessment can be viewed at <http://www.ecy.wa.gov/programs/wq/303d/index.html>.

We asked Brian Grantham, Supervisor for Ecology's Coastal and Estuarine Assessment Unit, to review all marine listings for conventional pollutants to determine if natural conditions would be attributed to the exceedances. Results were used to move waters off the 303(d) list into other categories if natural conditions were evident and anthropogenic sources were not considered significant. This analysis should alleviate concerns that natural conditions were not considered.

Thank you again for taking the time to provide comments to Ecology. If you have questions regarding the above responses, or would like further clarification, please feel free to call me at 360-407-6414.

Sincerely,

A handwritten signature in cursive script that reads "Susan Braley".

Susan Braley
Unit Supervisor
Watershed Management Section
